

LITC EMERGENCY DISASTER PLAN

Policy

The LITC Clubhouse will provide shelter, warmth (if applicable) and water in the event of a declared emergency affecting the LITC Community. The LITC Clubhouse is equipped with an emergency generator to provide power to the clubhouse.

Procedure

Upon notification of an emergency affecting the LITC community the Association President or designee will open the clubhouse for emergency shelter purposes.

Water, heat along with any other clubhouse amenities will be supplied as long as the building generator is operational.

An identification list will be used to document all persons who present themselves for shelter. Individuals will be allowed to remain sheltered in the clubhouse until the emergency has been declared under control by the Association President or designee.
